Maxim Introduces Tiller/Cultivator *Compact Mini Max Offers Extra Wide 16" Tilling*

ROGERS, MINN. – FEBRUARY 2018: Maxim has debuted the Mini Max, a mini tiller/cultivator powered by a Honda GX35 engine. The Mini Max can till hard soil to create new garden beds or prepare soil for planting by loosening and mixing soft soil.

An exclusive, heavy-duty transmission enables the tiller/cultivator to work in tough ground conditions and maintain existing or overgrown gardens with ease. An adjustable tilling width allows you to till widths of 7-, 13- or 16-inches. The Mini Max features 6 rugged and durable steel forged tines. A drag stake is easily adjustable without tools. A convenient carrying handle doubles as an engine guard and makes for easy transport.

ABOUT MAXIM

Since 1963, Maxim has manufactured outdoor power equipment. The line-up includes aerators, lawn rollers, plows, sprinklers, tillers and trimmers available for direct distribution and distribution through a network of dealers, rental stores, big-box stores, national accounts and hardware co-ops nationwide.
